Explanations	3
Ohio crop summary	4
United States crop summary	5
Acreage, yield, and production by counties	
Corn	6-7
All wheat	8-9
Oats	10-11
Soybeans	12-15
All hay	16-17
Winter wheat, abandonment of planted acres	9
Soybeans, acreage utilization	15
Principal crops, Ohio: Acreage, yield, production price and value	18-20
Prices received by Ohio farmers for principal crops	21-23
Ohio: Commercial vegetables for fresh market	24-25
Ohio: Commercial vegetables for processing	25
Ohio maple products	25
Livestock and Poultry (comments)	26
Production, marketings, and income	27
Inventory number and value	27
Number on farms, January 1, Ohio and United States	28
Hogs: Estimated number of sows farrowed and pigs saved on farms	28
Estimated number on farms, January 1, in Ohio	
Hogs, Cattle, Horses and Mules, and Sheep	29
Estimated number on farms, January 1, by counties	
All cattle and calves	30
Milk cows and heifers	31
Hogs, including pigs	32
Stock sheep	33
Chickens	34
Livestock and poultry, Ohio: Estimates number and value on farms	35
Inventory numbers, animal crop, disposition, production and income	
Cattle and calves, Ohio	36
Hogs, Ohio	37
Sheep and lambs, Ohio	38
Chickens, Ohio: Production, consumption, sales from farms	39
Average number of laying hens and pullets by months	39
Number on farms, January 1, 1952-1957—Commercial broilers	40
Turkeys, Ohio: Number produced on farms, and sales from farms	40
Cattle, Ohio: Bang's diseases and tuberculin tests	40
Milk—Cows and production; used and marketed; retail receipts	41
Farm marketings, income, and value of dairy products, Ohio	42
Milk cows and milk production on farms, Ohio and United States	42
Milk—pounds produced per day per cow in herds, Ohio crop reporters	43
Eggs, Ohio: Production, consumption, sales from farms	43
Monthly production, average number per 100 hens	44
Prices received by Ohio farmers for livestock by months	45
Prices received for livestock products, poultry and products	46
Prices received by farmers by districts	47-48
Season average prices received by farmers by districts	49-50
Farm wages rates, Ohio, monthly, daily, hourly, by quarters	51
Potatoes: Season average price per hundredweight received by farmers	51
Commodity-fed ratios, Ohio, by months	52
Gross cash farm income from sales of products and from government payments	53
Farm machinery, Ohio	54
Livestock numbers	55
Acknowledgments	55

EXPLANATIONS

This bulletin contains, in addition to other data, the current estimates of acreage, yield, and production of crops by counties, livestock numbers on January 1, by counties, and prices for a five-year period as have similar bulletins, previously published. Similar information for former years can be obtained in Bulletin 767, for 1953 and 1954; Bulletin 735, for 1951 and 1952; Bulletin 722, for 1949-1950; Bulletin 690, for 1947-1948; Bulletin 691, for 1942-1946; and Bulletin 642, for 1940-1941.

Estimates of crop production, livestock numbers, and prices for the state are shown for a five-year period. The historical series of state data on crops and livestock prior to 1952, can be found in: Agricultural Experiment Station Bulletin 767 back to 1950; Bulletin 722, back to the year 1946; to the year 1935 in Bulletin 691; to the year 1924 for crop data and 1925 for livestock data in Bulletin 642; to the year 1919 for crop data and 1920 for livestock data in Bulletin 554; and to the year 1910 for crop data in Bulletin 460.

Estimates of acreage, yield per acre, total crop production, numbers of livestock on farms and prices of crops and livestock products, unless otherwise stated, are based upon the data furnished by the reporters of the Ohio Crop Reporting Service. In some instances the yield per acre for various crops is computed by dividing the production by the acreage harvested.

Monthly crop and livestock prices are those of the fifteenth of the month unless otherwise indicated. Prices used in computing the value of total production of crops are weighted averaged prices for the particular crop year.

The historical series of Ohio cash farm income and government payments for the years 1924-1952 can be found in Bulletin 767 for 1953 and 1954, and from 1910 to 1946 in Bulletin 691 for 1942-1946. The present Bulletin publishes for the first time a summary table containing data on production and marketings of livestock, poultry, and their products for 1955 and 1956. Estimates of milk cows and milk production, by counties, that appeared in Bulletin 767, are not available. However, a series of more comprehensive data on production, farm use, and marketing of dairy products and cash receipts from sales for the State has been added.

Prices of potatoes (table on page 51) are not comparable with prices published in previous bulletins as the current figures represent the season average price per hundredweight for each of the two seasonal groups for which production estimates are now currently made.

Two new tables have been added in this issue, one on commodity-feed ratios and the other on the number of various farm machinery units on Ohio farms.

OHIO CROP SUMMARY: Acreage, yield, and production, 1955 and 1956

Crop	Year	Acreage harvested	Yield per acre	Unit	Production
All corn (a).....	1955	3,715,000	59.0	bu.	220,955,000
	1956	3,555,000	60.0	bu.	215,700,000
All wheat.....	1955	1,196,000	29.0	bu.	13,381,000
	1956	1,526,000	26.0	bu.	39,676,000
Oats.....	1955	1,251,000	51.0	bu.	63,801,000
	1956	1,101,000	43.0	bu.	47,343,000
Barley.....	1955	113,000	38.0	bu.	4,294,000
	1956	108,000	35.0	bu.	3,780,000
Rye.....	1955	32,000	20.5	bu.	656,000
	1956	26,000	19.0	bu.	494,000
Buckwheat.....	1955	4,000	17.5	bu.	70,000
	1956	5,000	18.0	bu.	90,000
All hay.....	1955	2,115,000	1.71	tons	1,110,000
	1956	2,205,000	1.70	tons	1,088,000
Alfalfa seed.....	1955	12,000	50	lbs.	600,000
	1956	4,000	60	lbs.	240,000
Red Clover seed.....	1955	196,000	51	lbs.	9,996,000
	1956	125,000	60	lbs.	7,500,000
Alsike Clover seed.....	1955	5,500	80	lbs.	440,000
	1956	4,000	60	lbs.	240,000
Sweet Clover seed.....	1955	12,000	210	lbs.	2,520,000
	1956	12,000	195	lbs.	2,340,000
Timothy seed.....	1955	58,000	160	lbs.	9,280,000
	1956	54,000	155	lbs.	8,370,000
Soybeans (for beans)...	1955	1,193,000	24.5	bu.	29,228,000
	1956	1,301,000	24.0	bu.	31,224,000
Potatoes.....	1955	22,700	149	cwt.	3,380,000
	1956	19,700	151	cwt.	2,962,000
All tobacco.....	1955	13,700	1591	lbs.	21,802,000
	1956	13,200	1650	lbs.	21,780,000
Sugar beets.....	1955	18,000	15.5	S. tons	279,000
	1956	16,500	12.1	S. tons	200,000
Popcorn.....	1955	16,500	2250	lbs.	37,125,000
	1956	19,000	2300	lbs.	43,700,000
Apples, Commercial (b).	1955	-----	----	bu.	2,700,000
	1956	-----	----	bu.	2,000,000
Peaches.....	1955	-----	----	bu.	1,030,000
	1956	-----	----	bu.	1,000,000
Pears.....	1955	-----	----	bu.	80,000
	1956	-----	----	bu.	45,000
Grapes.....	1955	-----	----	tons	17,000
	1956	-----	----	tons	8,500
Sweet cherries.....	1955	-----	----	tons	310
	1956	-----	----	tons	240
Sour cherries.....	1955	-----	----	tons	1,800
	1956	-----	----	tons	1,500
Commercial vegetables..	1955	62,200	----	----	-----
	1956	69,140	----	----	-----
Maple products.....	1955	378,000(c)	1,000(d)	lbs.	sugar 113,000
	1956	359,000(c)	1,000(d)	lbs.	syrup - gals. 152,000
Total, above crops.....	1955	11,043,600			
	1956	10,638,510			

(a) Covers corn for all purposes, including hogged and siloed corn, and that cut and fed without removing the ears, as well as that husked and snapped for grain. The yield for grain, with an allowance for varying yields of corn for other purposes, is applied to the total acreage to obtain an equivalent production, expressed in terms of grain.
 (b) Estimate of the commercial crop refer to the total production of apples in the commercial apple areas of the State of Ohio. (c) Trees tapped. (d) Total sugar produced.

UNITED STATES CROP SUMMARY: Acreage, yield, and production, 1955 and 1956

Crop	Year	Acreage harvested	Yield per acre	Unit	Production (1000 units)

LIVESTOCK AND POULTRY

Farm production of meat animals in Ohio in 1956, totaled 1,674 million pounds, one percent less than the 1,698 million pounds produced in 1955. The production of cattle and calves was 638.8 million pounds, about two percent more than in 1955, while the production of hogs and sheep were three and five percent less, respectively, than the previous year. Hog production amounted to 58 percent of the total farm production of meat animals in Ohio in 1956, with cattle and calves furnishing 38 percent and the remaining four percent coming from sheep and lambs.

Cash receipts from meat animals amounted to 275.5 million dollars, one percent more than the 271.8 million dollar income of 1955.

Milk production in Ohio during 1956 totaled 5,842 million pounds, slightly larger than the 1955 production of 5,758 million pounds. Of the 1956 production of milk farmers marketed 5,358 million pounds or nearly 92 percent of the total as milk or cream. Cash receipts from milk and cream marketed by farmer in 1956 totaled \$226.9 million, an increase of 10 percent from the previous year.

The 1956 production of poultry and poultry products was higher than in 1955. Egg production was up six percent, commercial broiler production up thirteen percent, turkeys up twelve percent and farm chicken production up four percent.

Lower prices of commercial broilers, farm chickens and turkeys during 1956 caused a reduction in cash receipts from the sale of these products as compared with 1955. Higher prices of eggs and a slight increase of marketings during 1956 account for the increase in cash receipts from eggs during that year.

The production of honey and beeswax was considerably lower in 1956 than a year earlier. Production of honey and beeswax were 32 percent and 44 percent respectively, of the 1955 production. Considerable lower yield per colony of bees due to the wet season and early frost, accounts for the smaller production in 1956.

The total gross farm income from livestock and poultry and their products, which includes cash receipts from sales plus an allowance for home consumption, was four percent higher in 1956 than the previous year.

OHIO FARM INCOME, 1955 - 1956

Total cash receipts from farm marketings in Ohio during the calendar year of 1956, were estimated at 1,020 million dollars as compared with 986 million dollars in 1955, an increase of about 3.4 percent. In addition, government payments received by Ohio farmers, estimated at 5.8 million dollars in 1955 and 16.0 million dollars in 1956, represented 0.6 percent and 1.6 percent, respectively of the total farm gross cash receipts in those years.

Cash receipts from farm marketings of meat animals - all cattle, hogs, and all sheep and lambs - represented the largest share the agricultural income in 1955 and 1956, averaging about 27 percent of the total. Dairy products accounted for nearly 22 percent of total cash receipts from farming during the 1955-1956 period. Cash receipts from corn, wheat and oats combined totaled about 191 million dollars in 1955, and 202 million dollars in 1956. These represented an average of 20 percent of total cash receipts from farming in Ohio for both years. Cash receipts from poultry and poultry products ranked as the fourth most important group of agricultural products contributing 11 percent of total cash receipts from farming in Ohio during 1955 and 1956. The share for other important products contributing to the cash income of Ohio farmers in the 1955-1956 period were: soybeans with seven percent and vegetables with nearly three percent.

LIVESTOCK NUMBERS

The number of all cattle on Ohio farms January 1, 1957, remained at the same level as the previous year. The current number is nine percent larger than average and only slightly less than the record number of 2,417,000 head on Ohio farms January 1, 1954. The number of milk cows and heifers two years old and older on Ohio farms showed no change during 1956. Estimated numbers for the last two years are the lowest since 1930.

The number of hogs and pigs on Ohio farms on January 1, 1957 was 2,666,000 head as compared with 2,836,000 a year earlier. This represents a decrease of six percent during 1956. Except for 1953, 1954, and 1955, current estimated numbers are the smallest since 1938.

On the other hand numbers of stock sheep, and chickens on Ohio farms on January 1, 1957 showed a slight increase over the preceding year. The number of stock sheep showed a one percent increase over a year earlier. The total number estimated at 1,046,000 head is the same as for January 1, 1955, and larger than any other year since 1948. The number of chickens on Ohio farms, excluding commercial broilers, increased two percent during 1956, but was about one-sixth below the average.

ACKNOWLEDGMENTS

The authors are greatly indebted to the large groups of Ohio farmers and people closely connected with agriculture who so splendidly cooperated by furnishing information monthly or by supplying special information at various times during the year.

We are also very grateful to the postmasters who, through the rural mail carriers, distributed and collected the livestock and acreage survey cards, which furnish information regarding changes in crop acreage and numbers of livestock on farms from year to year.
